September 23, 2015 MCW News - In honor of National Hispanic Heritage Month, which runs from Sept. 15 to Oct. 15, the Medical College of Wisconsin has created a series of video vignettes and stories that will be posted on InfoScope. The vignettes highlight some of the Hispanic and Latino members of the MCW community and the contributions they have made to our institution and our community. The stories highlight MCW programs that improve the health of underserved populations (including Hispanic and Latino), offer those populations improved access to health care and education, and reduce health disparities.

In today's video, Alfredo Dubra, PhD, associate professor of ophthalmology, discusses his research, the personal reasons behind his career choice, and what he would like his legacy to be. Dr. Dubra is from Uruguay.
